```php
<!--sortLeaderboard.php-->

<?php

    //start connection and session

    session_start();
    include 'Connect.php';

    //get all leaderboard and user details for all users that are on the leaderboard
    (so they have a leaderboardRank)

    $sql = "SELECT * FROM user, leaderboard WHERE leaderboardScore IS NOT NULL AND
    user.leaderboardRank = leaderboard.leaderboardRank ORDER BY leaderboardScore DESC,
    timecompleted DESC;";
    $result = mysqli_query($conn,$sql);

    //create table

    echo "
      <table>
      <tr>
      <th>Rank</th>
      <th>Username</th>
      <th>Score</th>
      <th>Time Completed</th>
      </tr>
      ";

      //set $count as 0

      $count = 0;

      //for each row returned by query

      while($row = mysqli_fetch_array($result)) {

          //add 1 to $count

          $count += 1;
          echo "<tr>";

          //echo $count (under table heading "rank")

          echo "<td>" . $count . "</td>";

          //echo username (under table heading "username")

          echo "<td>" . $row['username'] . "</td>";

          //echo leaderboardScore (under table heading "Score")

          echo "<td>" . $row['leaderboardScore'] . "</td>";

          //echo timecompleted (under table heading "Time Completed"

          echo "<td>" . $row['timecompleted'] . "</td>";
          echo "</tr>";
      }

    //finish table

      echo "</table>";

    //close connection

      mysqli_close($conn);

?>
```
